

Cornerless Blanket Feed/Fold/Stack Finishing System

EDGE BLANKET BLASTER

CHICAGO®

The Unmatched Speed, Labor Savings, Reliability, and Quality Folded Package of an Edge/Skyline System In a More Compact Space Saving Design

For those who are serious about producing a consistently high volume of neatly folded and stacked bath and other types of blankets or bedspreads, the Edge's patented cornerless loading system allows one person to effortlessly feed as many blankets as two people loading a traditional clip type feeder. The Return on Investment is dramatic as one FTE is eliminated when compared to other blanket processing systems and two or more FTE's are eliminated when compared to hand folding. The secret to achieving consistently neat stacks of finished blankets is that the primary and crossfolding sections of the Blanket Blaster are identical to Chicago's best selling Skyline Blanket folder. After primary folds are made by a traditional air pulse, a straight and accurate first crossfold is made by a heavy duty fold blade through pinch rolls. Chicago's second and third crossfolds are then made by Chicago's exclusive reversing conveyor method which produces jam-free crisp and accurate crossfolds every time before blankets are neatly stacked.

Blanket Blaster

Dimensions

and Utilities

NOTE:

1. Specifications subject to change without notice. Consult factory for certified construction floorplan.
2. Millimeter dimensions are in [].
3. All dimensions are +/- 1/2".
4. Discharge configuration may be reversed in field.
5. Utility connections are located as shown.
6. Single point electrical power and air connections.

CONNECTION(S)	DIA.	HEIGHT
A Air Connection	1/2"	16" [406]
D Compressed Air Drain	1/4"	13" [330]
E Electrical Connection	--	36" [914]

Controlled by Chi-Touch

The most exciting advance in finishing equipment control technology is available on many models in our automated product line. All the traditional CHI features and functions such as automatic operation, self-testing, fault display and built-in diagnostics are incorporated into an even faster PC-based color touch screen control. Its advanced architecture merges CHI's familiar simple intuitive control sequences with the technology to meet today's and tomorrow's needs.

Designed to meet the rigors of rugged laundry environments, the new CHI-Touch platform offers better visualization of functions for operators, floor management, and service teams. Its graphical interface has the flexibility to work with current and future reporting and networking technology, while maintaining CHI's field-proven flexibility to work in any laundry's environment.

Chicago's Blanket Blaster uses the same logic and major components as other Chicago equipment to assure consistency, parts availability, familiarity and ease of use for operators/maintenance staff.

A Complete Range of Separating, Feeding, Ironing, Folding, and Sorting Options

Because Chicago specializes only in flatwork finishing equipment, it can offer the world's widest range of high production separating, feeding, ironing, folding and sorting equipment. Complete flatwork finishing systems range from automated multi-roll systems producing over 2000 pounds per hour, to compact ironers for small on-premise laundries.

Chicago's performance record is unmatched in thousands of installations in commercial, hospitality, health care, textile rental, institutional and on-premise laundries all over the world. An experienced Chicago professional will be pleased to make an objective

equipment recommendation based on your production, space, utility and budget requirements. Contact your local Chicago distributor or the factory sales assistance office for a no-obligation analysis of your needs.

Chicago's Customer Service department offers full technical and service support by telephone and on our website. We also offer overnight service for quick parts availability. Visit our website, www.chidry.com, to learn more about our complete line of flatwork finishing systems, including video of Chicago® equipment in action.
